

Physiotherapy Report

Name: Fatimah Aamir D.O.B 19/03/2015 NHS Number: 712 783 0436
Address: 5 Sedgewick Close, Pound Hill, Crawley, West Sussex, RH10 7BZ

Diagnosis: Right hemiplegia

Fatimah is a 2 year old girl who has recently been diagnosed with a right hemiplegia by her Community Paediatrician Dr Atkinson.

Fatimah walks with an asymmetric gait and walks with a toe strike on the right with flexion of both her right and left knees. Fatimah is able to walk independently but due to her foot and leg position can easily trip and fall. She has been fitted with an Ankle Foot Orthosis to help with her foot position when walking and the aim will be for her to wear this during the day. This will need to be reviewed regularly as she grows.

Fatimah is able with adult supervision to go up steps holding a rail. Fatimah is able to stand up from the floor independently.

Fatimah's mum has been shown stretches as part of a home exercise programme.
